

BEAM scheduled to officially launch on 4.24.24

On 10.19.23 we launched a closed beta for BEAM and fifteen hundred people from around the world have joined to test BEAM's next-gen features. The reviews from these first pioneers have been overwhelmingly positive.

We're thrilled to announce that BEAM has been scheduled to officially launch on 4.24.24.

At launch BEAM will feature several unique built-in features including re-streaming, unified chat, viewer music selection, and tight integration with [GTribе](#).
