

## **BEAM and DJ GunZz Set New World Record for Most Simultaneous Live Multistreams**

**Creator Brian “DJGUNZZZZzzz” Goodman connects to 40 platforms live on BEAM, showcasing the power and simplicity of BEAM’s global multistreaming technology**

**DALLAS, TX / ACCESS Newswire / January 12, 2026 / BEAM ([beamstream.gg](https://beamstream.gg)) and creator Brian “DJGUNZZZZzzz” Goodman have set a new world record for the most simultaneous live multistreams, by connecting to 40 platforms simultaneously during Saturday’s live streaming event.**

The stream kicked off Saturday, January 10, 2026 at 1:00 PM ET as DJ GUNZZZZzzz and his guests celebrated achieving the record while live on BEAM. At 1:30 PM, BEAM leadership joined the stream via **Beacon MAX**, BEAM’s proprietary communications platform, for a live discussion about the technology and community driving this achievement. The stream continued with a celebration of creativity featuring live music, art, and gaming, all in collaboration with DJ GunZz and his special guests.

“Today, the world is seeing the first proof of our vision to connect audiences and creators everywhere,” said **Angel Munoz**, Co-founder and CEO of BEAM Media Corp. “BEAM removes the barriers that limit creators and gives them the power to reach anyone, anywhere. Our technology makes global connection effortless through features like Unichat, Univiewers, and Unititles. This moment shows what’s possible when technology serves creativity.”

“Streaming with BEAM has opened doors I never thought possible,” said **Brian “DJGUNZZZZzzz” Goodman**. “I connect with audiences around the world on platforms I could never reach all at once before. Seeing everyone come together in real time has been incredible. This is the future of live content, and I’m excited to keep building with BEAM.”

BEAM’s platform connects creators to over 90 platforms worldwide, with unified chat (unichat) and unified viewers (univiewers) support across 25 major services. Its advanced infrastructure delivers HD multistreaming with near-instant global connections, giving creators the speed, stability, and reach to engage audiences anywhere.

### **About BEAM**

Launched in April 2024, BEAM ([beamstream.gg](https://beamstream.gg)) has become the world’s largest multistreaming platform, enabling creators to broadcast simultaneously to 90 platforms across 210 countries. BEAM’s mission is to empower creators by simplifying livestreaming, increasing global reach, and building an interactive community-driven ecosystem.
