MASS LUMINOSITY RELEASES TELEPORTATION TECHNOLOGY AND VOICE AI IN PARTNERSHIP WITH PICOVOICE

DALLAS – October 1, 2021 – Mass Luminosity, a global research, development and technology company, announced it has released its patented technology, **Teleportation™**.

Teleportation enables users of **Beacon®**, a next-generation audio video communication platform, to seamlessly transfer an in-progress video conference from one device to another by pressing one button, or on the upcoming premium version of Beacon, by issuing a command to its patent-pending built-in voice AI, named SAMI™. For example, the voice command can be as simple as “transfer this call to my phone.” In two seconds or less, call participants are teleported from the original device to the smartphone associated with the account.

In an era of privacy concerns over voice-activated assistants, Beacon’s Voice AI introduces a higher standard of privacy. To pursue this higher standard, Mass Luminosity partnered with Picovoice and integrated their breakthrough technology that fits a voice AI on any device. Everything is processed on-device making it both HIPAA and GDPR compliant.

“We’ve made Beacon’s Teleportation both safe and easy, via the integration of the best wake word engine on the market, Picovoice Porcupine, to detect utterances of given wake phrases. Porcupine has been a great addition to Beacon, and offers a private, secure and seamless communication experience for our users,” said Angel Munoz, founder, president and CEO of Mass Luminosity, Inc.

SAMI will be released as part of the **Beacon PLUS** upgrade, scheduled to launch in October 2021. Available now is **Beacon X**, a free version, which allows unlimited conferencing for up to six participants. Beacon PLUS will be a premium version for up to 30 participants at \$4.95/month, and **Beacon MAX**, will allow up to 100 participants and voice calling for \$14.95/month.

“We’re passionate about building user-friendly, accurate and accessible voice solutions without sacrificing privacy. It’s been a great pleasure to share our passion with Mass Luminosity,” said Alireza Kenarsari-Anhari, CEO, Picovoice.
